Summary

Aspiring Software Engineer and AI/ML enthusiast with hands-on experience in developing scalable web and AI-powered applications. Proficient in Python, JavaScript, Machine Learning, and Computer Vision, with a strong foundation in Data Structures and Algorithms. Experienced in open-source contribution, hackathons, and leading technical events with real-world user impact.

Education

Anjuman Institute of Technology and Management

Sep 2023 - July 2027

Bachelor of Engineering (B.E), Computer Science (AIML) Engineering

Bhatkal, Karnataka

Experience

MR Tech Solutions

May 2026

AI/ML Intern

Remote

- Assisted in developing and testing machine learning models for data-driven applications.
- Performed data preprocessing, cleaning, and exploratory data analysis using Python and relevant libraries.
- Collaborated with the dev team to research and implement AI/ML algorithms for real-world business problems.
- Contributed to model evaluation, performance optimization, and documentation of AI solutions.

Projects

ArenaX College Fest Event Management Platform | *HTML, CSS, JavaScript, Node.js, MYSQL* **November 2025**

- * Developed a web-based event management platform to host mini-game competitions during the college fest.
- * Implemented participant registration, event scheduling, leaderboard management, and real-time score tracking features.
- * Successfully handled registrations and event operations for over **200 participants** during the live fest.
- * Collaborated with the organizing team to ensure smooth event execution and seamless user experience.

Personalized Weather Forecasting System | *Python, Machine Learning, WhatsApp API, Flask* **January 2026**

- * Developed a weather prediction system that generated forecasts based on user preferences and location data.
- * Integrated the forecasting engine with **WhatsApp messaging** to automatically deliver weather updates and alerts.
- * Applied machine learning techniques and weather datasets to improve prediction accuracy and user relevance.
- * Designed and implemented the project as a mini-project during the **5th Semester** of the undergraduate program.

AI-Powered Finance Management System | *Python, OpenCV, Computer Vision, Flask, MySQL* **May 2026**

- * Developed a finance management web application to automate expense tracking and financial record maintenance.
- * Implemented **CV and OCR** techniques to scan physical bills and extract transaction details automatically.
- * Designed a secure database system to categorize, store, and manage financial transactions efficiently.
- * Reduced manual data entry effort by automatically populating expense records from scanned receipts and invoices.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, HTML, CSS, SQL

Frontend: React.js, Next.js, Tailwind CSS, Vite, Responsive Design, State Management

Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, Webhooks, WebSockets, Socket.IO

Databases: PostgreSQL, MongoDB, Prisma ORM, Redis, Database Indexing

AI/ML: PyTorch, TensorFlow.js, Hugging Face Transformers, ONNX Runtime, Amazon Bedrock, NLP

Cloud & DevOps: AWS (Bedrock, Rekognition, Step Functions), Docker, Git, CI/CD, Vitest

Achievements / Leadership

Technical Quiz Winner | *Sentia 2026 (Hosted by MITE)*

April 2026

- * Secured **1st Place** in the Technical Quiz competition, demonstrating strong problem-solving skills and technical knowledge across multiple domains.

Hackathon Organizer & Mentor | *Version 1.0*

May 2026

- * Contributed to the successful organization of a college-level hackathon and mentored a participating team throughout the ideation and development phases.

Event Lead | *ArenaX – STEM'25*

November 2025

- * Conceptualized, organized, and hosted **ArenaX**, a mini-event during STEM'25, attracting and managing participation from **200+ students** across multiple gaming competitions.
